

AED MAP

aedmapa.pl

An app with a map of AED defibrillators

AED Map helps you find the nearest AED defibrillator in your area.

What is an AED defibrillator?

An AED is a defibrillator that delivers an electric shock during sudden cardiac arrest and restores a normal heart rhythm. It analyses the rhythm itself and guides you step by step by voice.

5% → 70%

This is how the chance of survival rises when defibrillation happens within the first minutes.

When someone is not breathing

- 1 Call 112.
- 2 Until the AED arrives, keep doing chest compressions.
- 3 Once the AED is switched on, follow its voice instructions.

Scan the code or go to **aedmapa.pl** and download the app from Google Play or the App Store.

112

The app does not replace an emergency call.
